The Arimathea portfolios consist of diversified, purpose-built allocations professionally managed for Catholics who wish to invest in alignment with Catholic Social Teaching (CST). The diligent and detailed screening process filters investments for adherence to CST and potential financial return, so Catholic investors can mitigate the struggle they face when living out their faith with their money.

With Arimathea, long-term asset appreciation aligns harmoniously with the wisdom of the Church as the filters assist in removing any morally objectionable companies from all investment portfolios.
